Proofread the following passage and correct the mistakes without changing the meaning. There is one mistake in each numbered line. Do not make any unnecessary changes or changes to punctuation. No line has more than one mistake. Corrections must be done as follows:

- ✧ **Extra word:** delete the extra word with a '×'
- ✧ **Wrong word:** underline the wrong word and write the correct word above it
- ✧ **Missing word:** mark the position of the missing word with a '^' and write the missing word above it

1	A recent report from UNICEF say that about a third of the 2 billion children
2	in the world are breathing toxic air. The situation is the worst in places that
3	are already suffering from poor, such as India. Despite the fact that six
4	hundred thousand children younger than the age of 5 dying every year from air
5	pollution-related diseases, not much has been do globally to clean the air.
6	It has found that children face much higher health risks from air pollution
7	than adults, as they breath twice as quickly as adults do and take in more air. Since
8	their brains and immune systems are still developing, the dirty air where
9	they inhale in will directly affect their body growth.
9	I hope the government can do anything to deal with the problem.

Bonus (10 marks)

1	2	3	4	5
6	7	8	9	10
